

# FOUNDATIONS FOR ENDOSCOPY

## TRAINING FOR PERIOPERATIVE & PROCEDURAL NURSES

### SAFE SURGERY TOGETHER

Equip your nurses with the skills to care for patients undergoing upper and lower gastrointestinal procedures. This course combines online didactic learning with interactive skills lab tools to teach evidence-based best practices, promoting the safety of both patients and staff.

#### Course Objectives

- Summarize the roles and responsibilities of the GI RN in the preprocedural, intraprocedural, and postprocedural areas.
- Describe practices that promote a safety culture in the procedural care environment.
- Identify professional and personal accountability aspects in the procedural care environment.
- Identify the basic equipment and supplies used during upper and lower GI procedures.

#### Learning Modules

- Anesthesia
- Assessment
- Environmental Cleaning
- Organizational Influences & Patient Outcomes
- Patient Safety
- Professionalism
- Surgical Specimens
- Transmissible Infection Prevention
- ASC Preoperative Care
- ASC Postoperative Care
- Periop 202: Gastrointestinal Procedures
