

# PERIOP 101: PERIOPERATIVE CARE FOR THE NON-RN

*Not Everyone in the OR is a Nurse or Surgeon*

AORN has created a course designed for clinical professionals to enable them to see and participate safely during invasive surgical procedures and to help keep patients safe.

This course provides new clinical content based on AORN *Guidelines for Perioperative Practice* featuring, redesigned modules, improved functionality and interactivity to provide clinical professionals valuable information and resources as they step into the perioperative environment.

## Administrator Support

Two-year access, from date of purchase to assign learner seats.

Administrator Implementation Course (.75 CH)
